NIPUN KUSHWAHA

Full Stack Engineer

Delhi, India | +91 79829 68400 | nipunrajput077@gmail.com | Portfolio: nipun-port.vercel.app | GitHub: /NipunKachwaha | LinkedIn: /in/nipun-

PROFESSIONAL SUMMARY

Full Stack & AI Engineer specializing in architecting low-latency web applications, multi-agent AI workflows, and scalable backend infrastructures using TypeScript, Next.js, Python, and .NET. Proven track record of building concurrent real-time platforms, multi-LLM routing pipelines, and automated background workflows that reduce system latency and eliminate manual operational overhead.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Python, C#, C++, SQL, Java, PHP
- **AI & ML:** LangGraph, LangChain, RAG Architectures, Multi-LLM Routing & Evals, Pandas
- **Backend:** Node.js, Express, FastAPI, .NET, Django, Laravel, Microservices, RESTful API, GraphQL
- **Frontend:** Next.js, React.js, Redux, Three.js, WebContainer API, Tailwind CSS
- **Databases & ORM:** PostgreSQL, MySQL, MongoDB, Redis, Supabase, Drizzle ORM, Pinecone
- **Cloud & DevOps:** GCP, Docker, Kubernetes, CI/CD (GitHub Actions), Linux

EXPERIENCE

Independent Consultant | Full Stack & AI Engineer **Nov 2025 – Present**

Architecting full-stack web applications and automated AI workflows for commercial clients.

- Spearheaded the end-to-end development of 3 production web applications using **React**, **Next.js**, and **Node.js**, optimizing page load performance and boosting client conversion rates by 45%.
- Architected custom AI agents and automated scheduling pipelines utilizing **Python** and **LLMs**, eliminating 20+ hours of weekly manual administrative overhead per client.

TECHNICAL PROJECTS

Sverkos | AI-Powered Cloud IDE & Development Platform GitHub Repo | Live Demo

- Architected a multi-module AI development platform using **Next.js** and **TypeScript**, implementing a Bring Your Own Key (BYOK) routing engine across 10+ LLMs to optimize inference costs.
- Integrated a secure in-browser IDE powered by the **WebContainer API**, enabling zero-latency Node.js code execution directly within the client browser.
- Engineered backend persistence via **Supabase** and **Drizzle ORM**, paired with an interactive 60 FPS 3D interface built with **Three.js**.

Ghost AI | Collaborative AI System Architecture Generator GitHub Repo | Live Demo

- Built an agentic architecture generator using **Next.js** and the **Google Gemini API**, autonomously parsing natural language prompts into 100+ interactive visual node configurations.
- Engineered a real-time multiplayer canvas using **Liveblocks**, synchronizing concurrent state across users with debounced auto-saving to **PostgreSQL**.
- Automated background job processing via **Trigger.dev** to compile visual node graphs into structured Markdown technical specifications.

LLM Arena | Real-Time Concurrent AI Benchmarking Platform GitHub Repo | Live Demo

- Architected a concurrent LLM evaluation platform using **Next.js** and **PostgreSQL** to stream and benchmark 3 open-source models side-by-side without main-thread blocking.
- Designed real-time telemetry pipelines tracking time-to-first-token (TTFT), tokens-per-second, and inference cost metrics to power a live public leaderboard.
- Secured API endpoints against bot abuse and prompt injections using **Arcjet**, with product analytics integrated via **PostHog**.

VIRTUAL EXPERIENCE & SIMULATIONS

Commonwealth Bank | Software Engineering Simulation (Forage) C#, .NET, React, TypeScript, MongoDB, xUnit

- Built backend REST APIs in **C#/.NET** and optimized **MongoDB** schemas for financial data retrieval, paired with **React/Redux** frontend state management and **xUnit** unit test suites.

Electronic Arts (EA) | Software Engineering Simulation (Forage) C++, OOP, System Architecture, Data Structures

- Authored technical architecture specifications and implemented optimized **C++** class hierarchies and header files to improve memory efficiency in gameplay entity systems.

EDUCATION

Indian Institute of Computer Science | Advanced Diploma in Website Engineering (Full Stack) **Expected Nov 2026**

Delhi University | Bachelor of Arts **Expected May 2027**

CERTIFICATIONS & ACHIEVEMENTS

- **Claude Code in Action:** Advanced certification in leveraging LLMs and AI-assisted development tools to automate scripting and CI/CD workflows.
- **Microsoft Learn AI Achievements:** Earned 8 official achievements in Azure AI, Microsoft Foundry SDK, RAG architectures, and LLM evaluation pipelines.
